France and Japan Collaboration Pitch on Synthetic Biology and Health

Genopole (France) and Kawasaki Institute of Industrial Promotion held an online meeting on 26 November 2021 to share innovative ideas and technology for future collaboration.

The meeting was organized to promote business exchanges in health and welfare based on a memorandum of understanding (MoU) announced on 5th February 2021 between Kawasaki Institute of Industrial Promotion (KIIP) and MEDICEN PARIS REGION (MPR) for “facilitating industry-industry and industry-academia partnerships.”

KIIP is responsible for promoting the activities of the Kawasaki INnovation Gateway (KING SKYFRONT)—an open innovation hub that creates new industry from the world's highest standard R&D; it is one of the most advanced R&D zones for life science and environment fields, which is expected to grow globally.

Proceedings of the meeting can be viewed at the KingSkyFront Lifescience Portal YouTube site here.
